## U.S. Department of Energy Announces \$40 Million for More Efficient Cooling for Data Centers

*15 Projects Will Develop High Performance Cooling Systems to Create More Energy Efficient Data Centers that Reduce Carbon Emissions and Mitigate Climate Change*

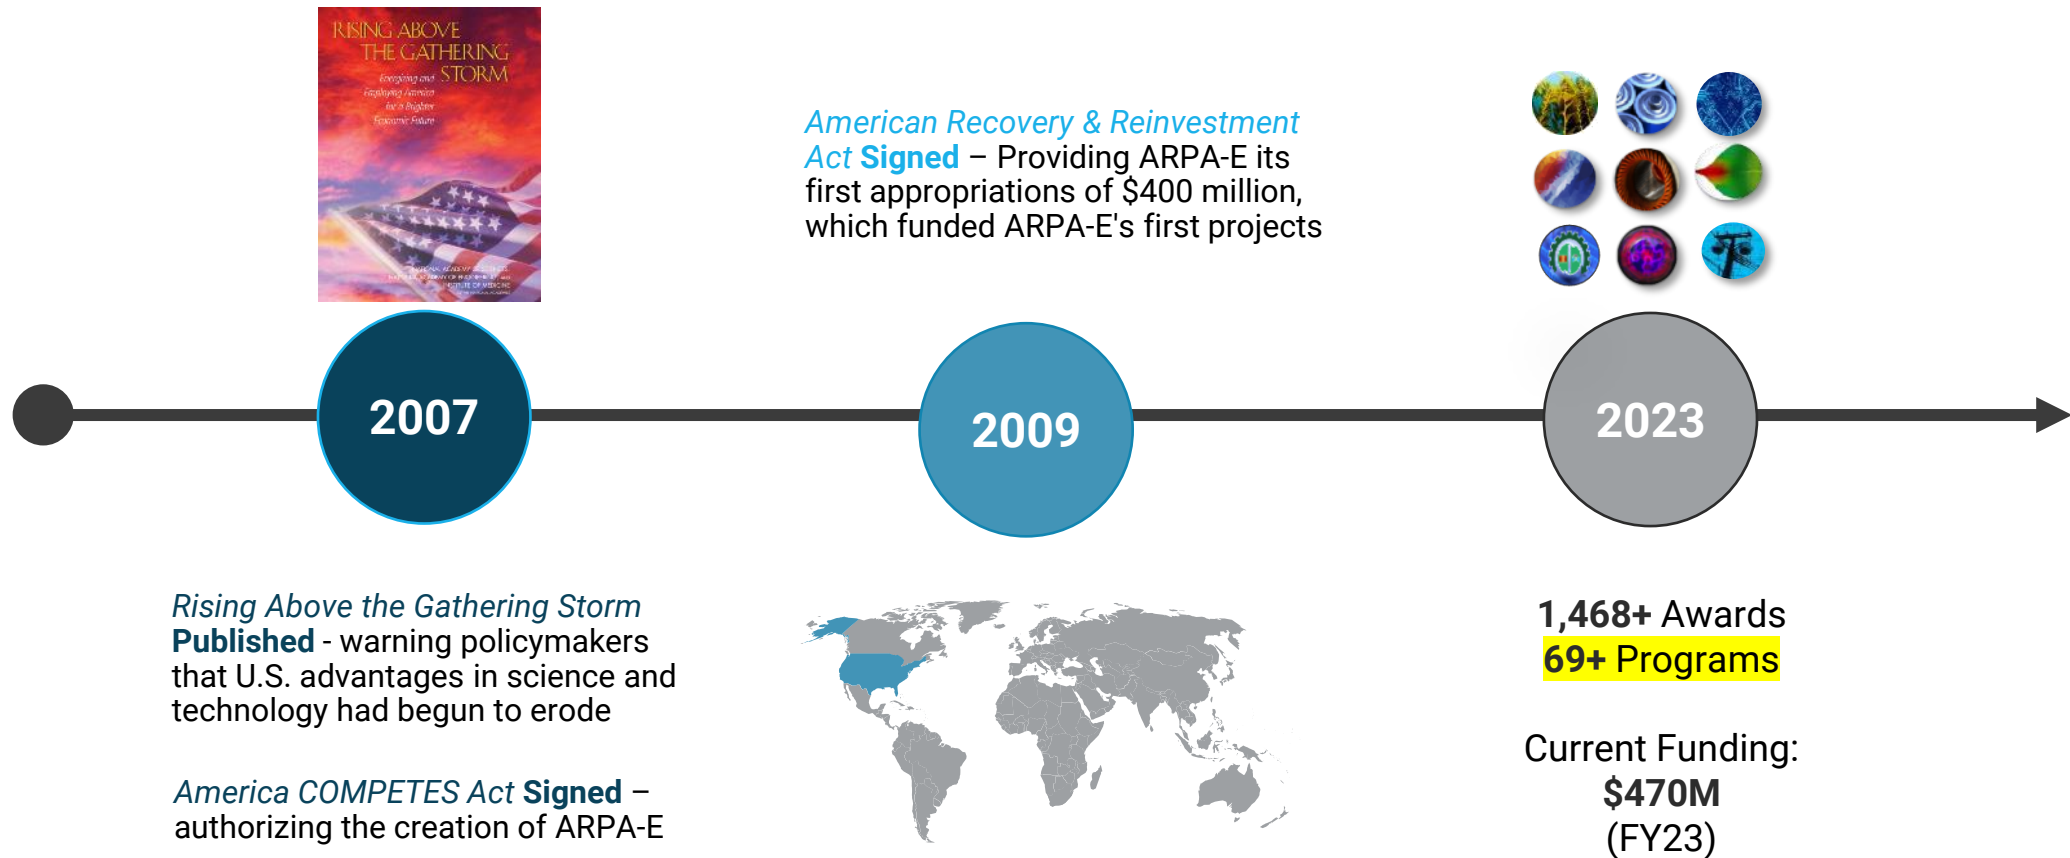

05/09/2023

*“Climate change, including severe weather events, threatens the functionality of data centers that are critical to connecting computing and network infrastructure that power our everyday lives,” said **U.S. Secretary of Energy Jennifer M. Granholm**. “DOE is funding projects that will ensure the continued operation of these facilities while reducing the associated carbon emissions to beat climate change and reach our clean energy future.”*

# History of ARPA-E

In 2007, The National Academies recommended Congress establish an Advanced Research Projects Agency within the U.S. Department of Energy to fund advanced energy R&D.
