# CO<sub>2</sub> vs Solid Carbon from 1 Quad of Hydrogen

## SMR – CO<sub>2</sub>

Image: pbs

**70 million MT @1,200 psi**  
**117 million m<sup>3</sup>**

## Methane Cracking – Solid Carbon

Image: dpa

**22.3 million MT**  
**~ 45 million m<sup>3</sup>**

# What's the better value proposition: CO<sub>2</sub> or solid Carbon?

---

## CO<sub>2</sub>

Baseline: \$0 per ton

Enhanced Oil Recovery: ~ \$40/ton

Carbon Capture & Storage: negative \$

## Solid Carbon

Metallurgical coal: \$100/MT

Carbon black: \$500-\$2,500/MT

Carbon nanotubes: \$1,000,000/MT

# What's the better value proposition: CO<sub>2</sub> or solid Carbon?

## CO<sub>2</sub>

Baseline: \$0 per ton

Enhanced Oil Recovery: ~ \$40/ton

Carbon Capture & Storage: negative \$

## Solid Carbon

Metallurgical Grade: ~ \$1,000/MT  
Graphite: ~ \$1,000/MT

>\$2,000 per karat  
(>\$10,000,000/MT)

# Not just \$\$\$, but also market size

## Total world market:

- ▶ Carbon Black: 12 million MT/yr
- ▶ Copper: 19 million MT/yr
- ▶ Cotton: 24 million MT/yr
- ▶ Aluminum: 49 million MT/yr
- ▶ Polyolefins: 120 million MT/yr
- ▶ Steel: 1,600 million MT/yr
- ▶ Concrete: ~20,000 million MT/yr

Remember:

1 Quad  $H_2$  ~ 22.3 million MT C

**...but, it's hard to compete with dirt.**

# Workshop intended for early Summer '17...

---

- ▶ ...will bringing together experts in:
  - **catalysis**
  - **process engineering**
  - **material science, and**
  - **product/application development**
- ▶ ...to better define the most promising research and development opportunities to advance methane cracking towards a commercially relevant technology.
- ▶ If you are interested, in this topic area, please see me here at the summit or send me an email: **marc.vonkeitz@hq.doe.gov**

A photograph of an industrial facility, likely a refinery or chemical plant, featuring several tall distillation columns and a complex network of pipes. The scene is set against a dramatic sky with a bright sun low on the horizon, creating a silhouette effect on the structures and a warm, golden glow. The text "Thank you!" is superimposed in the upper center of the image.

# Thank you!
