Proposed Action Title: University of Illinois at Urbana - Champaign -- Mobile Energy-Crop Phenotyping Platform (TERRA-MEPP)

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): CA, IL, NY, TX

Proposed Action Description:

Funding will support the project team's small-scale, research and development activities to develop an autonomous transportable robotic platform equipped with sensors to accelerate crop improvement. Specifically, the project team will: (1) combine high-throughput phenotyping with the robotic platform with genomics; (2) refine the sensor package and software support for greater processing; and (3) identify physiological and morphological traits that contribute to final yield at different growth stages. If successful, the project can reduce the land footprint needed to achieve renewable energy goals, increase sorghum economic viability, and identify germplasm for marginal land.

Project tasks will be conducted on a small-scale basis in dedicated laboratory, testing, and fabrication facilities at University of Illinois at Urbana-Champaign (Urbana-Champaign, IL), Cornell University (Ithaca, NY), Signetron Inc. (Berkeley, CA), NexSteppe (Hereford, TX), Agribile (Champaign, IL), EarthSense (Champaign, IL). Project tasks will be conducted in accordance with established safety and materials/waste management protocols and pursuant to applicable Federal, State, and local regulatory requirements. No modifications will be made to the existing facilities to accommodate the proposed work.

Categorical Exclusion(s) Applied:

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

Proposed Action Title: University of Illinois at Urbana-Champaign - TERRA-MEPP (Mobile Energy-Crop Phenotyping Platform)

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Urbana-Champaign, IL; Ithaca, NY; Berkeley, CA

Proposed Action Description:

Funding will support small-scale, research and development activities to develop and field test TERRA-MEPP (Mobile Energy-Crop Phenotyping Platform), a tactical, semi-autonomous, ground-based vehicle to perform high-throughput field-based phenotyping of crop canopies. TERRA-MEPP will use visual, thermal, multi-spectral reflectance, and other electronic sensors to collect critical crop information with integrated data storage and processing to identify individuals with potential for high yields. The proposed activities will be designed to enable understanding of plant response to environmental conditions and opportunities to improve crops for any region.

Project tasks will be conducted at existing facilities, and will be conducted in accordance with applicable Federal, State, and local safety and environmental requirements.

Categorical Exclusion(s) Applied:

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).
