Proposed Action Title: University of Delaware - Durability Investigation for Quarternary Phosphonium Based Polymer Hydroxide Exchange Membranes/Quaternary Phosphonium Based Hydroxide Exchange Membranes for Efficient and Durable Electrolyzers

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Newark, DE

Proposed Action Description:

Funding will support two efforts: (1) durability testing and analysis of battery cells outfitted with the University of Delaware's novel phosphonium based polymer hydroxide exchange membrane, and (2) creation of a batch of phosphonium based polymer hydroxide exchange membranes for use in another ARPA-E project. Activities related to the creation of the membranes under this award are analyzed in this determination. NEPA analysis for the project to which the membranes are being provided, DE-AR0000121, is conducted in that project's NEPA Determination.

Proposed work for the first effort of this project will consist of (1) fabrication of small fuel cells containing the University of Delaware's novel exchange membrane, and (2) durability testing of those fuel cells to analyze the degradation mechanism of the exchange membrane.

Proposed work for the second effort will include (1) scaling-up of the hydroxide exchange membranes for use in another ARPA-E project, and (2) preparation of hydroxide exchange membranes of varying sizes and thicknesses for that project.

Categorical Exclusion(s) Applied:

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
